

H-100 Bagger

H-100 Bagger

A completely modular packaging system, the H-100 easily ties into counting, weighing and conveying equipment. The Autobag H-100 Bagger is an all purpose, high-speed plastic packaging machine. It dispenses Autobag plastic bags on a roll, opens and heat seals them automatically, rated up to 45 packages per minute with typical applications around 30-35 packages per minute.

Options: The H-100 plastic packaging system can accommodate a variety of optional equipment:

- In-line imprinting
- Labeling
- Counting
- Weighing

Features:

- System is simple to operate and maintain.
- Small and compact, requires minimal floor space.
- Uses genuine Autobag® bags-on-a-roll. Bags come in a variety of styles. Sizes up to 10.5" x 22" in thickness from .0015" to .004" - plain or pre-printed in up to six colors.
- Fast and easy bag changeover.
